# MAJOR PROJECT ABSTRACT

1. Title : DermaAI : Intelligent Sinkcare
2. Class & Semester : IT-C & 7th
3. Academic Year : 2025-26
4. Batch Number : 47

| S. No. | Student Name | Hall Ticket No. |
|---|---|---|
| 1 | Deeksha Sandra | 22911A12E2 |
| 2 | G.R.Akshay Kumar | 22911A12E7 |
| 3 | K. Sannihitha | 22911A12J5 |
| 4 | Y.Tejaswini | 22911A12K0 |

5. Organization / Place : VJIT
6. Domain : AI-ML
7. Internal Guide : Mrs. Qudsia Tahniyath

Abstract

This project focuses on developing a mobile application that provides personalized skincare recommendations based on individual skin types. The app helps users identify whether their skin is oily, dry, combination, normal, or sensitive through a short questionnaire or image-based analysis. Using this data, it applies a recommendation algorithm to suggest suitable skincare products and avoid those containing ingredients that may cause irritation or allergies. In addition, the app offers skincare tips, product reviews, and personalized routines to help users build effective skincare habits. By integrating technology with dermatological insights, the project aims to create a smart, reliable, and user-friendly skincare assistant that simplifies the process of choosing the right products. Ultimately, it empowers users to make informed skincare decisions tailored to their unique needs, promoting healthier skin and enhancing overall confidence in their skincare choices.
